

# HYDRASUN TRAINING

## THREAD AWARENESS COURSE

This half day training programme has been designed to give delegates an awareness of the common end terminations utilised in fluid power systems. It describes the main characteristics and sealing forms, as well as giving the delegates an understanding of how to correctly identify end terminations by utilising appropriate instruments and data. This is followed by a practical activity where delegates will have to successfully identify a range of fittings.

### COURSE DETAILS

- Thread Characteristics
- Thread Forms, Function and Sealing Methods
  - *B.S.P.P*
  - *B.S.P.T*
  - *N.P.T*
  - *J.I.C*
  - *S.A.E*
  - *Metric EO series*
- Autoclave connections
- End Connector Materials
  - *Range of Materials*
  - *Working Pressures*
- Assessment
  - *Multi-choice Knowledge Test*
  - *Practical thread identification activity*

### CERTIFICATION

- Hydrasun certificate

### COST

- Price on application – Maximum 6 delegates per course
